### **4C Certified Coffee Purchases Reach a Historical High of 701.2 Thousand Metric Tons**

During 2020, the purchases of 4C certified coffee amounted to **701.2 thousand metric tons or over 11 million bags** (60kg). This number is **historically high** and represents an important milestone for the 4C standard. Compared to the previous year, the reported purchases **increased by 18%**.

This tells us that our efforts to strengthen the 4C system were not left unnoticed. **We are pleased to share this accomplishment**, which is not only ours but also belongs to:

- All the 4C certified producers who practice and perfect sustainability of their farms and facilities over time,
- All the certification bodies cooperating with 4C who tirelessly conduct sustainability audits and help to improve the sustainability performance,
- And last but not least every roaster, brand owner, and consumer who decided in favor of responsibly produced certified coffee, instead of conventional one.

**It is great to see that certified sustainable coffee is on its rise.** We hope that this trend will continue since sourcing sustainable coffee incentivizes the implementation of good agricultural practices and provides better livelihoods.

### **“A Path to Coffee’s Climate Neutrality: From a Tree to a Cup” – Join Us This Thursday!**

Join us for the first event in the 4C online seminar series on **15 April 2021 at 14:00 CEST!** We will kick off with a “hot” topic of climate neutrality from a tree to a cup. Jan Henke, Meo Carbon Solutions, will tell the participants about the **calculation and reduction of green coffee’s carbon footprint as well as climate friendly certification for coffee**, whereas Marcelo Burity, Nestlé, will present the **roaster’s perspective** and give an **overview of Nestlé’s net zero carbon roadmap**. Finally, Inna Knelsen, ISCC, will provide some insights into **bio and circular packaging for food and drinks**.

We are looking forward to having you with us. **Stay tuned every second week, at 14:00 CEST!** More information [here](#).

### Sharing Responsibility for Coffee of the Future: 4C Talked to “Coffee and Tea in Russia”

Recently 4C engaged in an interesting discussion with the “Coffee and Tea in Russia” magazine since **sustainability is becoming increasingly important in the growing Russian coffee market. 4C answered several questions** about the standard and its history, certification process, and the importance of sustainability for every coffee stakeholder.
