

[Web Version](#)

**Dear 4C Community,**

as another eventful and in many ways challenging year draws to a close, we want to remember and honour **our joint achievements of 2022**. While the global coffee sector has faced obstacles such as bad weather, fluctuating prices and supply chain disruptions, we have also made **significant progress towards a more sustainable future**.

We successfully launched the [4C Carbon Footprint Add-On](#) this year and **the first 4C units have already calculated and verified their emission values and introduced reduction measures**; a significant milestone towards more climate friendly coffee production!

Others have highlighted their **commitment to promoting gender equality in coffee** through joining trainings and pilot projects on the [4C Gender Equality Add-On](#). The issue of food insecurity has also been aggravated this year by political instability and inflation. Thus, the participation of so many 4C system users in our joint training with [FSS](#) on the [4C Food Security Add-On](#) was especially important.

Above all, we wish to keep working on the **continuous improvement of the 4C system** in 2023 to benefit all our users equally. **Your feedback** helps us tremendously to achieve this and [we always welcome comments and suggestions](#) from the 4C Community.

**We thank all of you for your support and trust. We look forward to many more successful years in sustainable coffee production with you!**

To everyone celebrating, we wish you **Merry Christmas** and a **Happy New Year!**

**All the best,  
Your 4C Team**

---

## Welcome to our new 4C System Users in 2022

We want to extend a warm welcome to all the users and certification bodies that joined the 4C system this year.

We love to see 4C grow and look forward to our collaboration with you!
